

Using Aerosols Safely

Aerosols can be harmful and even dangerous. Precautions should be made to protect both the user and others. Here are some guidelines regarding the wearing of personal protective equipment, remedial actions that should be taken in the event an accident, and guidance regarding storage and disposal.

Disposal Considerations

General Information

Do not puncture or incinerate, even when empty.

Disposal Methods

Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Containers should be thoroughly emptied before disposal because of the risk of an explosion.

Exposure Controls

Provide Adequate Ventilation

Avoid inhalation of vapours and spray/mists. Observe any occupational exposure limits for the product or ingredients.

Personal Protection

When using do not smoke.

Eye/Face Protection

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. The following protection should be worn: Chemical splash goggles.

Hand Protection

Due to the packaging form, aerosol, risk of skin contact is small. Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible.

Hygiene Measures

Wash promptly if skin becomes contaminated. Wash hands thoroughly after handling.

Respiratory Protection

If ventilation is inadequate, suitable respiratory protection must be worn.

Handling & Storage

Precautions For Safe Handling

Read and follow manufacturer's recommendations. Keep away from heat, sparks and open flame. Eliminate all sources of ignition. Do not spray on a naked flame or any incandescent material.

Storage Precautions

Extremely flammable. Pressurized container: protect from sunlight and do not expose to temperatures exceeding 50°C. Do not pierce or burn, even after use. Store in a dry, cool and well ventilated place.

First Aid Measures

Inhalation

If spray/mist has been inhaled, proceed as follows. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. If breathing stops, provide artificial respiration. Keep affected person warm and at rest. Get medical attention immediately.

Ingestion

Rinse mouth thoroughly with water. Do not induce vomiting. Get medical attention.

Skin Contact

Remove contaminated clothing immediately and wash skin with soap and water.

Eye Contact

Rinse immediately with plenty of water. Remove any contact lenses.
