

AD 1000 iQ

FUME EXTRACTOR

SELECTIVE LASER SINTERING

LASER ENGRAVING AND CUTTING | LASER CODING AND MARKING | SELECTIVE LASER MELTING

A WORLD LEADER IN FUME EXTRACTION TECHNOLOGY

AD Access

AD Nano+

AD Oracle iQ

AD 2000 iQ

Compatible accessories: Spark Arrestor 2, ILF 600

iQ communication | Universally recognised symbols and alarms

iQ control | Temperature alarms inside filter and electrical chambers

iQ accuracy | Hours run display and live filter readings

iQ performance evaluation | Download data via USB connection

Contact BOFA at donaldsonbofa.com/contact/

FS 643451

Approvals: REACH and RoHS. See individual product technical data for specific accreditations

TECHNICAL DATA

Technical data		Customisations
Dimensions (H x W x D)	1205 x 615 x 790 mm	Options Stop / start function Filter signal condition VOC Exhaust box / exhaust spigot
Unrestricted airflow*	875m ³ /hr (+/- 10%)	
Settable range**	300-780m ³ /hr	Paint finish Powder coated mild steel (RAL7016)
Max pressure	60mBar (+/- 3%)	
Electrical data	Voltage: 230V Frequency: 50/60Hz Full load current: 12.5 amps	
Interface signal connection	Not included as standard (see options for more information)	Power cables Type B Type E Type G
Max noise level	< 85dBA	
Weight (standard extractor with filters)	147kg (+/- 5%)	
Approvals	UKCA, CE and UL***	

* **Unrestricted airflow** = The airflow values provided with clean filters, no hose kit, at 230V and measured by using wind vane. The numbers may vary depending on voltage and test procedure used.

** **Settable range** = BOFA recommends utilizing the lowest flow rate that achieves the correct capture velocity for your application in order to maximise filter life.

*** **UL** = Tested to UL standards, but testing may be provided by alternate nationally recognized test laboratories. Certain product configurations may affect the UL certification. Please speak to your sales representative.

EXTRACTION TECHNOLOGY

Airflow through filters

FILTER SPECIFICATIONS

DeepPleat DUO pre-filter specifications

Media surface area	30m ² approx. (129.12ft ²)
Filter efficiency	F8 - 50% @ 0.3 microns

Combined filter specifications

HEPA filter efficiency	99.995% @ 0.3 microns
Activated carbon volume	53.67ltrs

Replacement filters

Model	DeepPleat DUO pre-filter	Combined filter

Where applicable, the carbon used in BOFA units is capable of removing a wide range of VOCs, however it is the responsibility of the user to ensure the carbon is suitable for their application. For specific applications, please contact us for details.

Important notice: Many factors beyond the control of BOFA can affect the use and performance of BOFA products in a particular application, including the conditions under which the product is used. Since these factors are uniquely within the user's knowledge and control, it is essential the user evaluate the products to determine whether the product is fit for the particular purpose and suitable for the user's application. All products, product specifications, availability and data are subject to change without notice, and may vary by region or country.
